BioMedix CEO John Romans Awarded APMA Executive Director's Award

St. Paul, MN, April 19, 2010 — John Romans, President and CEO of BioMedix Vascular Solutions, Inc., was recently honored with the American Podiatric Medical Association (APMA) Executive Director's Award. This prestigious award has been presented annually since 2000 by APMA's Executive Director and recognizes Mr. Romans as a significant contributor to the advancement of podiatric medicine and/or the American Podiatric Medical Association in 2009.

"John Romans has been ardent supporter of the American Podiatric Medical Association (APMA) and the important role that our podiatric physician members play in the early recognition and diagnosis of Peripheral Arterial Disease (PAD)," said APMA Executive Director Dr. Glenn B. Gastwirth. "As CEO and President of BioMedix Vascular Solutions, an APMA Corporate Partner, John has helped to foster a PAD collaborative care model that includes vascular surgeons, interventionalists and podiatric physicians. This model has helped to improve the quality of care for countless people suffering from PAD."

Under the direction of Mr. Romans, BioMedix has helped to build podiatric centers of excellence for patient care by providing integrated hardware, software and web-based solutions, including TRAKnet™ DPM Electronic Health Records (EHR) and Advanced Practice Management System—designed specifically by and for podiatric physicians—and the PADnet™+ vascular diagnostic device, which boasts more than 250,000 completed tests to date with approximately a 50% rate of abnormality.

"Our plan was to create a community-based care model where primary care doctors with access and influence over patients at risk for vascular disease could collaborate with vascular specialists to improve disease diagnosis, treatment and management," said John Romans. "Today, thousands of vascular specialists are collaborating with podiatric physicians across the country, saving limbs and lives on a daily basis. I couldn't be prouder of my association and that of BioMedix with the improved care podiatric physicians are enabling within the cardiovascular arena."

About BioMedix

BioMedix Vascular Solutions, Inc. provides the only integrated suite of hardware, software and online services designed to cost-effectively detect Peripheral Arterial Disease (PAD) and Chronic Venous Insufficiency (CVI). Vascular specialists, primary care providers, hospitals and health systems use our products to identify these patients. Our devices and Health Information Technology (HIT) software reduce mistakes, provide data for sound analysis, build practice revenue and streamline reimbursement while providing a platform that supports the continuum of care and increased quality outcomes. For more information, call 651-276-9106 or log on to www.BioMedix.com.

About the American Podiatric Medical Association

Founded in 1912, the American Podiatric Medical Association (APMA), headquartered in Bethesda, Maryland, is the leading resource for foot and ankle health information. Currently, the organization represents a vast majority of the estimated 15,000 podiatrists in the country. In addition to the national headquarters, APMA boasts 53 state component locations throughout the United States and its territories, as well as affiliated societies. For free foot health information, contact APMA at 1-800-FOOTCARE (1-800-366-8227) or visit www.apma.org on the Web.
