Advanced Practice Management Solutions
DPM

Seamless transcription services

Podiatric Physicians using BioMedix™ TRAKnet™ DPM Advanced Practice Management Solutions can now work directly with transcription service providers. **Effective January 1, 2011, BioMedix™ will no longer bill for transcription services, meaning a more direct, seamless transcription experience from beginning to end for both client and transcription provider.**

Current clients will see no change in the way their TRAKnet™ DPM software functions.

Transcription services available

In order to best serve all clients, the current TRAKnet™ DPM transcription staff will begin working independently from BioMedix™ on January 1, 2011 as *Transcription Service*. If you currently utilize BioMedix™ TRAKnet™ DPM transcription services, your default provider will be the independent Transcription Service group.

The Transcription Service group is familiar with TRAKnet™ DPM and consists of independent contractors providing accurate and efficient service with guaranteed 48-hour turnaround time.

- Understanding of TRAKnet™ DPM
- Guaranteed turnaround time
- Cost-effective services
- Great customer support

Enabling transcription providers

BioMedix™ will support and enable initial setup for Transcription Service or any other transcription provider at no additional cost to TRAKnet™ DPM clients. To start this process, obtain a transcription request form by contacting BioMedix™ directly.

To set up a transcription service provider for TRAKnet™ DPM access, it is required that a copy of the signed Business Associate Agreement between client and provider be submitted to BioMedix™ along with the completed transcription request form. This is required whether Transcription Service will continue to serve as the chosen provider or a new provider is chosen.

TRAKnet™ is Accepted
