**BioMedix™ Releases Update to TRAKnet™ PM – DPM Edition
Advanced Practice Management and EHR**

DPM EDITION

ST. PAUL, MN — July 13, 2011 — BioMedix™, a leader in supporting the Podiatric community with integrated Health Information Technology (HIT) products and services, announces the latest release of TRAKnet™ PM – DPM Edition, featuring more than 60 enhancements that make this all-in-one solution even more efficient and user friendly.

TRAKnet™ PM – DPM Edition is a fully ONC-ATCB Certified Electronic Health Record (EHR)* and practice management system designed by and for Podiatric physicians. This software interface update release includes key functionality and workflow enhancements, including more intuitive options, instant access to product guides and improved Meaningful Use features to provide a superior user experience.

“Tailoring our solutions to the needs and interests of the Podiatric community adds significant value for our current and future clients,” said BioMedix™ Chief Software Technologist, Scott Leum, DPM, “Investing in software solutions that continually adapt to the needs of the Podiatric practice gives physicians and staff the opportunity to focus more on patient care.”

TRAKnet™ PM – DPM Edition enables seamless operation, increased efficiency and reduced costs by incorporating billing, charting, scheduling, e-prescribing and inventory management, allowing effortless transition from scheduling to encounters and claims. It interfaces with the full suite of BioMedix™ products and services to provide a total solution for Podiatric centers of excellence.

“BioMedix™ is committed to providing the most intuitive solutions that enable efficient and effective patient care and practice operations,” said John Romans, BioMedix™ President & CEO, “We are proud to support Podiatric physician practices with time-saving updates while ensuring that TRAKnet™ PM – DPM Edition remains a leading practice management and EHR solution.”

About BioMedix™

BioMedix™ is a leader in Health Information Technology (HIT) software, products and services that connect Podiatric Physicians, Primary Care Physicians, vascular labs, vascular specialists and healthcare systems in a continuum of collaborative care. We provide the only integrated suite of hardware, software and online services designed to cost-effectively detect vascular disease. Our award-winning suite of medical devices, advanced practice management and Electronic Health Record (EHR) software and web-based solutions give providers a more complete view of patient care.
