## **BioMedix™ Releases Update to TRAKnet™ PM Advanced Practice Management and EHR**

ST. PAUL, MN — November 1, 2011 — BioMedix™, a leader in supporting the medical community with integrated Health Information Technology (HIT) products and services, today released a TRAKnet™ PM program update, which includes enhancements such as an upgraded superbill and refined e-prescribing workflow.

TRAKnet™ PM is a fully ONC-ATCB Certified Electronic Health Record (EHR)\* and practice management system for podiatry, primary care and sub-specialty practices. This program release includes more than 60 software updates and functionality improvements to support the best user experience. These include a newly enhanced, fully-customizable superbill, refined e-prescribing workflow, digital signature capture, updated digital x-ray interface and automated National Provider Identifier (NPI) information retrieval. TRAKnet™ PM also now interfaces with add-on office automation solutions such as patient messaging, patient registration and an internet fax solution for comprehensive information exchange capabilities.

“With each update, TRAKnet™ PM provides more time-saving tools, bringing additional value to our clients,” said BioMedix™ Chief Software Technologist, Scott Leum, DPM, “We continue to develop our products to meet the changing needs of today’s medical practices.”

TRAKnet™ PM enables seamless operation and reduced costs by incorporating billing, charting, scheduling, e-prescribing and inventory management, allowing effortless transition from scheduling to encounters and claims. Quarterly software updates boost the speed and value of these features, providing increased efficiency. TRAKnet™ PM is available via a cloud-based or premise-based model, and interfaces with a variety of ancillary tools as well as the full suite of BioMedix™ products and services.

“We are committed to supporting physicians and their staff with intuitive new features and services,” said John Romans, BioMedix™ President & CEO, “BioMedix™ is proud to provide solutions that streamline workflows and enhance patient care.”

### **About BioMedix™**

BioMedix™ is a leader in Health Information Technology (HIT) software, products and services that connect podiatric physicians, primary care physicians, vascular labs, cardiovascular and sub-specialty physicians, and healthcare systems in a continuum of collaborative care. We provide the only integrated suite of hardware, software and online services designed to cost-effectively detect vascular disease. Our award-winning suite of medical devices, advanced practice management and Electronic Health Record (EHR) software and web-based solutions give providers a more complete view of patient care.
